The MANUAL ENGINE START procedure is a "read and do" procedure. Refer to FCOM/99 Duref cible before starting a manual engine start. The FADEC has limited control over the manual start process. It ensures that the engine start valve closes at 50 % N2. It monitors engine parameters, and generates an associated warning when necessary.

Set the ENG START selector to NORM. It is recommended to run the engines at or near idle for 3 minutes. Manual start The main difference to a normal start is that the pilot controls when fuel and ignition are applied to the engine. The FADEC provides passive monitoring only. It closes the start valve and switches off the ignition at 50% N3.
