

ahlfors complex analysis solutions pdf

Complex analysis, traditionally known as the theory of functions of a complex variable, is the branch of mathematical analysis that investigates functions of complex numbers. It is useful in many branches of mathematics, including algebraic geometry, number theory, analytic combinatorics, applied mathematics; as well as in physics, including the branches of hydrodynamics, thermodynamics, and ...

Complex analysis - Wikipedia

A complex number is a number of the form $a + bi$, where a and b are real numbers and i is an indeterminate satisfying $i^2 = -1$. For example, $2 + 3i$ is a complex number. A complex number may therefore be defined as a polynomial in the single indeterminate i , with the relation $i^2 + 1 = 0$ imposed. From this definition, complex numbers can be added or multiplied, using the addition and ...

John Charles Fields (1863–1932) was a Canadian mathematician who made significant contributions to the theory of algebraic surfaces and the theory of automorphic functions. He was awarded the Fields Medal in 1930, the highest honor in mathematics. He is also known for his work on the theory of differential equations and the theory of groups.

Laves graph - Wikipedia

The Laves graph is a triply-periodic (on a bcc lattice) and chiral. It is of interest for a variety of reasons, not least because a left- and right-handed pair of these graphs (an
