In mathematics, a system of linear equations (or linear system) is a collection of two or more linear equations involving the same set of variables. For example, $x + y = 1$, $x + z = 2$, $x + y + z = 3$ is a system of three equations in the three variables x , y , z . A solution to a linear system is an assignment of values to the variables such that all the equations are simultaneously satisfied.
