The door-in-the-face (DITF) technique is a compliance method commonly studied in social psychology. The persuader attempts to convince the respondent to comply by making a large request that the respondent will most likely turn down, much like a metaphorical slamming of a door in the persuader's face.

### **Door-in-the-face technique - Wikipedia**

The axilla (also, armpit, underarm or oter) is the area on the human body directly under the joint where the arm connects to the shoulder. It also provides the under-arm sweat gland.. In humans, the formation of body odor happens mostly in the axillary region. These odorant substances serve as pheromones which play a role related to mating. The underarm regions seem more important than the ...
