chain and bead jewelry pdf

A ball chain is a type of chain consisting of small sheet metal balls connected via short lengths of wire.. The balls are hollow and have two small antipodal holes. These holes accept a short length of wire deformed on the end like a rivet so that the end is bound inside the ball. The wire is then connected to another ball using the same method.

A necklace is an article of jewelry that is worn around the neck. Necklaces may have been one of the earliest types of adornment worn by humans. They often serve ceremonial, religious, magical, or funerary purposes and are also used as symbols of wealth and status, given that they are commonly made of precious metals and stones.. The main component of a necklace is the band, chain, or cord that ...
