Nonlinear Analysis | ScienceDirect.com

The duality gap is the difference between the values of any primal solutions and any dual solutions. If $\hat{\mu}$ is the optimal dual value and \hat{v} is the optimal primal value, then the duality gap is equal to $\hat{\mu} - \hat{v}$. This value is always greater than or equal to 0.

Duality (optimization) - Wikipedia

Linear programming (LP, also called linear optimization) is a method to achieve the best outcome (such as maximum profit or lowest cost) in a mathematical model whose requirements are represented by linear relationships. Linear programming is a special case of mathematical programming (also known as mathematical optimization).. More formally, linear programming is a technique for the ...

Linear programming - Wikipedia

NONLINEAR PROGRAMMING $\min_{x \in X} f(x)$, where $f: n \rightarrow \mathbb{R}$ is a continuous (and usually differentiable) function of n variables $x \in X$ and X is a subset of \mathbb{R}^n with a continuous character. If $X = \mathbb{R}^n$, the problem is called unconstrained. If f is linear and X is polyhedral, the problem is a linear programming problem. Otherwise it is a nonlinear programming problem

(2018-05-23) Definitions and notations (inherited from tradition). The equal sign may be used to say that a

scalar is the sum of a series.. A (formal) series is just a vectorial object consisting of an infinite sequence of scalar coefficients (called terms). The formal series of general term a_n is denoted: $\sum_{n=0}^{\infty} a_n$. A summation method (also summation mapping or summation, for short) is a ...

This paper reviews the state of the art in cyber security risk assessment of Supervisory Control and Data Acquisition (SCADA) systems. We select and in-detail examine twenty-four risk assessment methods developed for or applied in the context of a SCADA system.

A review of cyber security risk assessment methods for

This is the first tutorial in the "Livermore Computing Getting Started" workshop. It is intended to provide only a very quick overview of the extensive and broad topic of Parallel Computing, as a lead-in for the tutorials that follow it.

Introduction to Parallel Computing

Gaussian Processes and Kernel Methods Gaussian processes are non-parametric distributions useful for doing Bayesian inference and learning on unknown functions. They can be used for non-linear regression, time-series modelling, classification, and many other problems.
