Irreducible complexity (IC) is the idea that certain biological systems cannot evolve by successive small modifications to pre-existing functional systems through natural selection. Irreducible complexity is central to the creationist concept of intelligent design, but it is rejected by the scientific community, which regards intelligent design as pseudoscience.

This paper aims to survey the maturing BPM discipline. Section 2 provides a historic overview of BPM. Section 3 further structures the BPM discipline. For example, processes are classified using BPM-relevant properties. Section 4 lists various BPM use cases. These use cases refer to the creation of process models and their usage to improve, enact, and manage processes.

Another great post. You may not realize it, but you are changing the way many of us practice. You got me with this one. While I long stopped using Narcan in alive patients except in cases of hypoventilation in the opiate patient, I can't tell you the number of times I have tossed in Narcan in a cardiac arrest without really considering what I have been doing or its effect.
