Research into the many possible relationships, intersections and tensions between language and gender is diverse. It crosses disciplinary boundaries, and, as a bare minimum, could be said to encompass work notionally housed within applied linguistics, linguistic anthropology, conversation analysis, cultural studies, feminist media studies, feminist psychology, gender studies, interactional ...

Gender is the range of characteristics pertaining to, and differentiating between, masculinity and femininity. Depending on the context, these characteristics may include biological sex (i.e., the state of being male, female, or an intersex variation), sex-based social structures (i.e., gender roles), or gender identity. Traditionally, people who identify as men or women or use masculine or ...

English is a West Germanic language that was first spoken in early medieval England and eventually became a global lingua franca. Named after the Angles, one of the Germanic tribes that migrated to the area of Britain that would later take their name, England, both names ultimately deriving from the Anglia peninsula in the Baltic Sea. It is closely related to the Frisian languages, but its ...
