Problem solving and critical thinking refers to the ability to use knowledge, facts, and data to effectively solve problems. This doesn't mean you need to have an immediate answer, it means you have to be able to think on your feet, assess problems and find solutions. The ability to develop a well thought out solution

describe steps of problem solving? In this study, we investigate problem solving in the domain of chemical equilibrium. Equilibrium, which involves reversible chemical reactions, is a difficult topic for students to master, and the complex nature of problem solving allows for the investigation of varying levels of expertise.
