In the following sections, we identify broad categories of works related to CNN. Fig. 1 shows the hierarchically-structured taxonomy of this paper. We first give an overview of the basic components of CNN in Section 2. Then, we introduce some recent improvements on different aspects of CNN including convolutional layer, pooling layer, activation function, loss function, regularization and ...

Since 2000, cloud computing has come into existence. In August 2006, Amazon created subsidiary Amazon Web Services and introduced its Elastic Compute Cloud (EC2). In April 2008, Google released Google App Engine in beta. In early 2008, NASA's OpenNebula, enhanced in the RESERVOIR European Commission-funded project, became the first open-source software for deploying private and hybrid clouds ...

Efficient vertical mobility is a critical component of tall building development and construction. This paper investigates recent advances in elevator technology and examines their impact on tall building development. It maps out, organizes, and collates complex and scattered information on multiple aspects of elevator design, and presents them in an accessible and non-technical discourse.

LFW Results by Category Results in red indicate methods accepted but not yet published (e.g. accepted to an upcoming conference). Results in green indicate commercial recognition systems whose algorithms have not been published and peer-reviewed. We emphasize that researchers should not be compelled to compare against either of these types of results.

Objective Advances in Geometry is a mathematical journal for the publication of original research articles of excellent quality in the area of geometry. Geometry is a field of long standing-tradition and eminent importance. The study of space and spatial patterns is a major mathematical activity; geometric ideas and geometric language permeate all of mathematics.
