The precautionary principle and environmental risk

Types of factor analysis. Exploratory factor analysis (EFA) is used to identify complex interrelationships among items and group items that are part of unified concepts. The researcher makes no a priori assumptions about relationships among factors.. Confirmatory factor analysis (CFA) is a more complex approach that tests the hypothesis that the items are associated with specific factors.

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Using data from a SCADA system testbed implemented at the University of Louisville as a case study, the use of these proposed vulnerability and risk assessment tools was illustrated. The revised augmented vulnerability tree for the security enhanced system is shown in Fig. 4.1. By comparing the indices for threat impact and vulnerability on SCADA communication protocols with, and without ...
