### **scattering parameters in rf pdf**

Scattering parameters or S-parameters (the elements of a scattering matrix or S-matrix) describe the electrical behavior of linear electrical networks when undergoing various steady state stimuli by electrical signals.. The parameters are useful for several branches of electrical engineering, including electronics, communication systems design, and especially for microwave engineering.

A two-port network (a kind of four-terminal network or quadripole) is an electrical network or device with two pairs of terminals to connect to external circuits. Two terminals constitute a port if the currents applied to them satisfy the essential requirement known as the port condition: the electric current entering one terminal must equal the current emerging from the other terminal on the ...

- 2 - For the purpose of characterizing microwave amplifiers, key transmission line concepts are 1) Traveling waves in both directions,  $V_+$  and  $V_-$  2) Characteristic impedance  $Z_0$  and propagation constant  $\gamma$  3) Reflection coefficient  $\Gamma = \frac{Z_L - Z_0}{Z_L + Z_0}$  for complex load  $Z_L$  4) Standing waves resulting from  $\Gamma$  5) Transformation of  $Z_L$  through line of  $Z_0$  and length  $l$
