

selfadjoint operators in spaces pdf

In mathematics, a self-adjoint operator on a finite-dimensional complex vector space V with inner product $\langle \cdot, \cdot \rangle$ is a linear map A (from V to itself) that is its own adjoint: $\langle Av, w \rangle = \langle v, Aw \rangle$, for all vectors v and w . If V is finite-dimensional with a given orthonormal basis, this is equivalent to the condition that the matrix of A is Hermitian, i.e., equal to its conjugate transpose A^* .
